Education

Bachelor of Science in Information Technology
South Eastern Kenya University – 2015–2019
Second Class Honors (Upper Division)

Advanced Certificate in International Certification in Digital Literacy (ICDL)
NIBS Technical College - 2025

Certificate in International Certification in Digital Literacy (ICDL)
Machakos Institute of Technology – 2015

Key Skills

ICT Systems Support

Scratch Junior

Network Support

Statistical Analysis & Modelling

Professional Profile.

Experienced ICT and Systems professional with practical expertise in systems analysis, requirements gathering, business process analysis, system design, development, testing, implementation, integration, and maintenance. Skilled in analyzing organizational processes, identifying system requirements, translating business needs into functional and technical specifications, developing system workflows, use cases, process models, data models, and system documentation, and supporting the implementation of scalable and user-centered ICT solutions. Experienced in API integration, database design, SQL, system testing, troubleshooting, and systems enhancement, with a strong understanding of organizational ICT infrastructure and enterprise applications.

Proficient in using Microsoft Visio, Draw.io, Lucidchart, Figma, Microsoft Excel, SQL/MySQL, Power BI, Python, Git/GitHub, Postman, REST APIs, HTML, CSS, JavaScript, PHP, Node.js, React, and Microsoft 365 to support systems analysis, process modelling, prototyping, data analysis, API testing, system development, and documentation. Experienced in conducting requirements elicitation, stakeholder consultations, gap analysis, feasibility assessments, workflow analysis, data analysis, user acceptance testing (UAT), system documentation, and change management.

Experienced in analyzing, designing, implementing, and enhancing organizational systems while collaborating with users, management, developers, vendors, and other stakeholders. Skilled in developing Software Requirements Specifications (SRS), Functional Requirements Specifications (FRS), use cases, process flow diagrams, system architecture documentation, data flow diagrams, entity-relationship diagrams (ERDs), test cases, user manuals, and technical documentation. Able to provide technical leadership, identify opportunities for automation and process improvement, and translate complex business requirements into effective technology solutions.

Professional Experience

ICT & Communications Officer **April 2026 - Present**
The Institute for Social Accountability. (TISA) Westlands.

- Administered Microsoft 365 services, including user accounts, licenses, email, Teams, OneDrive, and other cloud-based productivity services.
- Managed Microsoft Azure environments, including user identities, access controls, cloud resources, and related services.
- Administered SharePoint environments, including sites, document libraries, permissions, access controls, and collaboration platforms.

Dashboard Development & Visualization.

System Development

SQL & Database Management

Backup & Disaster Recovery

Python, SPSS, Excel & Google Sheets

Data Governance & Accuracy

Web Server Support.

Data-Driven Decision Making

Cyber Security & Data Protection.

Analytical Communication & Presentation

Referees

Ms. Vasdinus Ngemu
Chairperson, Computer Science

bereyamos@gmail.com

Md. Caroline Onkangi
ICT Lecturer
South Eastern Kenya University
0716 787 895
conkangi@seku.ac.ke

- Managed cloud and endpoint security using Bitdefender GravityZone, including security policies, endpoint protection, monitoring, and incident response.
- Managed and maintained CCTV surveillance systems, including configuration, monitoring, troubleshooting, and system maintenance.
- Managed biometric and door access control systems, including user enrollment, access permissions, configuration, and troubleshooting.
- Managed and administered organizational network infrastructure, including routers, switches, wireless networks, internet connectivity, and network security.
- Developed, maintained, and managed organizational websites, including content updates, functionality, security, and performance optimization.
- Implemented Search Engine Optimization (SEO) strategies to improve website visibility, search engine indexing, traffic, and online presence.
- Managed organizational data and system backups, including backup schedules, storage, monitoring, recovery, and restoration procedures.
- Managed hosting environments, domains, DNS configurations, databases, and related web infrastructure to ensure availability and optimal performance.
- Managed SSL certificates and domain renewals, ensuring websites and online services remained secure and accessible.
- Managed ICT vendors and Service Level Agreements (SLAs), including vendor coordination, service monitoring, renewals, and resolution of technical issues.
- Serviced and maintained laptops and other ICT equipment through preventive maintenance, troubleshooting, upgrades, and performance optimization.
- Managed ICT assets, including asset registration, allocation, tracking, maintenance records, lifecycle management, and accountability.
- Supported implementation of data protection and ODPC compliance requirements, including ICT security controls, data handling practices, access management, and compliance documentation.
- Collected, analyzed, visualized, and interpreted organizational data to develop reports and dashboards supporting evidence-based decision-making.
- Conducted user training and ICT capacity-building sessions on organizational systems, Microsoft 365, cybersecurity, data protection, and effective use of ICT resources.
- Conducted systems analysis and requirements gathering to identify organizational business needs and translate them into appropriate ICT system solutions.
- Designed, developed, tested, implemented, and enhanced organizational ICT systems in line with business requirements and defined specifications.
- Provided technical support and troubleshooting for users experiencing challenges with applications, systems, networks, websites, computers, and other ICT services.

- Created user manuals, technical documentation, and video tutorials to facilitate effective adoption and use of organizational systems.
- Provided remote user assistance and technical support using remote access tools such as AnyDesk and TeamViewer.
- Monitored ICT systems, infrastructure, and services to ensure availability, reliability, security, optimal performance, and minimal downtime.

eLearning System Admin & Computer Science Lecturer. **Oct 2023 – Mar 2026.**

Nairobi Institute of Business Studies (NIBS)

- Analyze revenue trends and performance metrics for the Virtual Campus to support strategic decision-making.
- Assisted in writing, testing, verifying, and enhancing simple computer programs in line with defined instructions and specifications.
- Supported deployment, configuration, and maintenance of institutional systems and applications to ensure availability, reliability, and usability.
- Provided first-line ICT support to users on applications, ERP systems, networks, websites, and computer systems.
- Installed, configured, repaired, and maintained computer systems, ICT equipment, and associated peripherals.
- Monitored ICT equipment and system performance to ensure optimal functionality and minimal downtime.
- Managed ICT asset inventories and maintained accurate equipment and issuance registers, ensuring accountability of ICT assets.
- Provided technical input to support procurement of ICT equipment and services when required.
- Documented ICT procedures and supported implementation of routine and annual ICT maintenance plans.
- Developed and presented analytical reports and dashboards to support operational and management decision-making.
- Supported user account management and access controls to safeguard data and ensure appropriate system usage.
- Assisted in website maintenance and ensured systems remained functional and secure.
- Conducted cybersecurity awareness sessions and supported compliance with data protection requirements.
- Collaborated with technical teams and service providers to resolve system and network incidents promptly.
- Trained students on CBET practical courses, including hands-on system installation, network configuration, ICT equipment maintenance, and safe use of ICT facilities in line with institutional standards.
- Management of Digital Portfolio of Evidence for elearning students.
- User manual and video tutorial creation for users. Remote user assistance using remote access tools such as Anydesk & Team Viewer.

HOD ICT / Systems & Network Support.

August 2019

KIPS Technical College **– Sept 2023**

- Managed wired and wireless networks, ensuring 99% system availability.
- Managed wired and wireless network infrastructure across the institution, ensuring high system availability through continuous monitoring and preventive maintenance.
- Configured and maintained routers, switches, access points, and basic firewall settings to support secure and reliable connectivity.
- Implemented user account management, secure login policies, antivirus systems, and routine data backup procedures to safeguard institutional data.
- Provided first-line ICT support to a large user base across multiple campuses, resolving system, network, and application-related issues efficiently.
- Oversaw deployment, administration, and continuity of eLearning systems, including migration to cloud-based platforms during COVID-19 lockdowns to ensure uninterrupted learning.
- Maintained accurate ICT asset inventories and equipment registers, including issuance, tracking, and accountability of ICT assets.
- Supported ICT procurement processes by providing technical specifications and evaluation input when required.
- Monitored network performance and bandwidth usage, and supported Service Level Agreement (SLA) compliance and vendor performance reporting to ensure consistent service delivery.
- Trained students on CBET practical courses, including hands-on system installation, network configuration, ICT equipment maintenance, and safe use of ICT facilities in line with institutional standards.

IT Intern (Network Support) **May 2018**

KIPS Technical College **– Aug 2018**

- Assisted in installation and setup of network devices, printers, and switches.
- Performed regular maintenance and troubleshooting to minimize downtime.
- Conducted hardware repairs, software updates, and basic network configuration.
- Maintained accurate ICT asset and equipment registers, including tagging, issuance, tracking, and reconciliation of hardware to support accountability and audit requirements.
- Provided continuous system user support by responding to service requests, troubleshooting hardware, software, and network issues, and guiding users on effective use of ICT resources.
- Updated asset records following installation, repair, replacement, or disposal of ICT equipment, ensuring registers remained current and reliable.

Certifications.

- Data Protection – CIPIT, Strathmore University (2025)
- CISCO Ethical Hacking – Cyber Shujaa, USIU (2024)
- Cyber Security Analysis – Cyber Shujaa, USIU (2024)

- ITIL 4 Fundamentals – Alison (2023)
- Web Security – Mindluster (2024)
- Android App Development – Emobilis (2024)
- Google Project Management & UX Design – Coursera (2022)

Technical Tools

- **Programming & Data Tools:** Python (libraries), SQL, Microsoft Excel, SPSS
- **Systems & Web Administration:** cPanel, Web Server administration
- **Project & Systems Documentation:** Microsoft Project, Visio, Jira, Lucidchart
- **Support & Recovery Tools:** Hiren's BootCD (data recovery, password reset), AnyDesk (remote user support)

Systems & Solutions Developed.

- **Water Billing Management System** with integrated data analytics.
- **Safaricom M-Pesa API (STK Push)** payment gateway integration.
- **School assignments management system.**
- **M-Pesa Payments Analysis** & Reporting Dashboard.
- **Moodle-based E-Learning** Platform deployment and customization.
- **RentIQ** – Rent collection and property management automation system.
- **Online E-Commerce** Computer Shop with sales analytics.
- **Church Reporting** & Records Management System.
- E-Learning **SmartBoard** platform for digital content delivery.
